SKILLS

Frontend & UI: React, TypeScript, JavaScript, Redux/Zedux, AG Grid, Tailwind CSS, HTML, CSS

Real-Time & Data: WebSockets, RxJS, AMPS

Testing & Quality: Jest, React Testing Library, Cucumber, E2E

EXPERIENCE

Trumid

May 2025 - Present

Frontend Engineer (React)

Remote

- Own and lead major parts of Trumid's Portfolio Bond Trading React application, acting as the frontend SME for key trading workflows and defining architectural patterns used across the protocol.
- Drive frontend architecture and UI/UX consistency across multiple trading protocols, designing reusable components and layouts that scale as the platform grows.
- Partner closely with Product, Design, and QA to deliver high-impact trader features, balancing speed, attainability, and long-term maintainability.
- Improve performance and reliability in data-heavy views by optimizing state subscriptions and modernizing legacy components.
- Contribute to internal AI developer tooling by curating and documenting knowledge files, helping teams use AI more consistently and effectively in day-to-day development.
- Deliver weekly production releases via AWS CI/CD pipelines.

JPMorgan Chase & Co.

Jul 2020 - May 2025

Software Engineer II

Houston, TX

- Led development of real-time React trading applications used daily by thousands of traders, delivering low-latency market data visualization and trade execution across global exchanges.
- Designed and built a cross-application communication framework using RxJS and OpenFin, enabling real-time data sharing across desktop apps and significantly reducing manual workflows.
- Improved frontend performance under high-frequency data loads through AG Grid virtualization, intelligent caching, and lazy loading, keeping critical screens responsive during peak market activity.
- Drove migrations from legacy trading systems to a modern React architecture, improving reliability, lowering operational risk, and reducing long-term maintenance costs.
- Established frontend testing and quality standards using TypeScript, Jest, and React Testing Library, raising the bar for code quality and long-term maintainability across teams.

American Express

Jun 2019 - Aug 2019

Software Engineer Intern

Phoenix, AZ

- Built a full-stack React and Node.js monitoring tool to visualize real-time credit card processing failures and system alerts.
- Developed RESTful health-check endpoints and dashboards used during stress testing and production monitoring.

EDUCATION

University of Houston

Bachelor of Science in Computer Science

May 2020

CERTIFICATES

AWS Certified Cloud Practitioner

05/07/2024 - 05/07/2027
